of Churches and Ministries

Are you Ready...

...ready to network ?

NETWORK — a set of connections between organizations or individuals interacting with each other to benefit the entire group.

BIBLICAL NETWORKING — The New Testament clearly depicts first century churches closely linked through shared apostolic and ministry leadership. This connection allowed leaders and congregations to benefit by sharing in the experiences of all the churches within their network. Together they grew as a community — as individuals, congregations, and as a regional church.
